

# Radiator /Garage Door Reflector Foam

- Double-layer insulating foam
- (Can be used for radiator, garage door, tent, shed, or as a car sunshade)
- Reduces heat loss from radiators (by up to 90%) and prevents unnecessary wall heat , especially if this last one is poorly insulated. Heat is reflected directly back into the room.
- Easy way to reduce Energy Waste !

## Step by step :

- Measure your radiator.
- Cut strips slightly shorter (5 to 10cm less) than the radiator so that the insulating foam remains invisible
- Use double-sided tape (not supplied) on the white side (wall side) to fix the strips on the wall.
- Slide the foam strip behind the radiator and stick onto the wall

## Technical Description

Material : polyethylene foam + aluminium polyester film  
Available in 2 dimensions

% of recycled material in the product	10 %
% recycled product in packaging	100 %
Hazardous substance > 0.1%	No
Repairability Index	10 / 10
Recyclable product	Yes
