

Charging Station for Electric Bikes or Scooters

- Provide a reliable and secure parking solution for your electric bike or scooter with our individual rack.
- It features a sturdy hoop for safely locking your bike and a lockable box (using the same lock as your bike) to protect the battery and charger. No more carrying the battery in your bag: you can now leave it safely in its dedicated compartment.
- The hoop comes with a rubber protective pad to safeguard the bike frame.
- A waterproof power outlet is included for safely charging your two-wheeler (electrical installation and civil works are the customer's responsibility).
- Multiple stations can be connected using the supplied ground joining rail—perfect for series installations or routing cables to a wall.
- Suitable for both indoor and outdoor use thanks to rust-resistant treatment (galvanization + bichromating + phosphating + polyester powder coating).
- The ideal solution for public spaces, businesses, residential complexes, and shops looking to offer secure and functional parking for electric bike riders.
